## Easy, inexpensive, hassle-free alternative to Myob and Quickbooks

The most common complaint we at **IMPACT Accounting Solutions** hear from our business clients is the rigid, unfriendly and confusing nature of big name accounting programs such as MYOB and Quickbooks.

The frustration and time wasted on trying to make the software work creates an unnecessary burden for small business owners already stretched for time. It's a common issue and one that prompted us to look for a quick and simple alternative. After researching various options, we think we've found the answer.

[Banklink](#) has just introduced [PayablePlus](#) to complement their existing InvoicePlus system. It's an easy to use, all-in-one accounting solution that manages debtors and creditors, without the complexity of a full accounting package.

It's a fraction of the price of big name brands and is so simple to use and easy to understand. No more muddled messes at the end of the year!

**The standard BankLink software is available free of charge!** For a demonstration of what BankLink is all about visit the [IMPACT Accounting Solutions website](#). For a small investment of \$55, we can upgrade you to PayablesPlus and/or InvoicePlus.

BankLink also integrates with the taxation software IMPACT Accounting uses to lodge tax returns with the Australian Taxation Office. **So when you switch to BankLink we'll save time doing your tax, meaning you'll save money from reduced accounting fees!** We can also process your bookkeeping or train you to do it yourself.

To find out more about BankLink, PayablesPlus and InvoicePlus visit us online at [www.impactaccounting.com.au](http://www.impactaccounting.com.au) or contact [Natasha Vanroon](#) at IMPACT Accounting Solutions on **07 5530 6395**.
